

Viewing, Navigating, and Printing the Bureau of Design and Environment Manuals With Adobe Acrobat Reader 5.0

The Bureau of Design and Environment Manuals have been prepared as Portable Document Format (PDF) publications for use with the Adobe Acrobat Reader application. You can conveniently navigate the various parts of each manual using the links within the pages, the bookmarks in the window to the left of the main document window, and the navigation buttons in the toolbar above the main window. The toolbar also provides commands/buttons for opening files, printing pages, displaying or hiding the bookmarks window, selecting text, changing the page view, and searching for specific words in PDF documents. The Reader Guide, accessible from the Help menu within Acrobat Reader, provides detailed guidance on how to use the links, bookmarks, and commands/buttons in the toolbar. It also provides information on how to print PDF documents.

To view the Reader Guide and this page simultaneously, open the Reader Guide from the Help menu and use the Window > Tile commands in the menu bar to display both documents.

To go to the Bureau of Design and Environment Manuals, click the links below or the bookmarks in the window to the left:

BDE Manual 2002 Edition
